

ver. 0.7b

Introduction

Do you sometimes feel stressed out and need to find some time to relax and take a step back from your busy day-to-day life in *GTA V*?

Did you ever want to find a way to cruise through the vast breathing world of Los Santos and Blaine County while listening to one of the many music stations available without the need to drive for yourself?

Do you consider yourself to be more luxury-oriented?

Then, this may be for you!

Take a seat in the stretch limousine and head out for a ride with your own armed driver. You decide where to go and how to get there. Switch on the radio or TV, roll down the windows and show the world that you deserve being rich.

And if you get lonely, why don't you invite one of the, more or less, beautiful girls to ride with you? Should they like it, you may get a pleasing offer... :-). - new in 0.7b

Last but not least, should you find an interesting spot on your way, you can command the driver to stop, so you can get out to take a look.

Installation

You need to download the Script Hook V (can be found here: <http://www.dev-c.com/gtav/scripthookv/>) and unpack the dinput8.dll ScriptHookV.dll into your main GTA V folder. The GTA5_LimoMod.asi and the LimoMod.ini need to go into that folder, too. You should be all set and ready to go.

Features

- ✓ spawn a stretch limousine including your own armed driver who follows you where ever you go
- ✓ switch to 4 different seats
- ✓ roll 4 different windows up and down
- ✓ toggle the radio on or off
- ✓ change music stations
- ✓ toggle the tv inside the car on or off
- ✓ switch tv channels, change the tv volume and brightness to your likes
- ✓ invite up to 2 girls to join you in the limo - new in 0.7b
- ✓ 3 different driving modes or **free roam** - new in 0.7b
 - normal → slow obeying the traffic rules
 - fast → fast, but still obeying the traffic rules
 - reckless → fast and without obeying the traffic rules, prepare to get your stretch scratched :-)
- ✓ fully customizable keys and settings (LimoMod.ini)

Configuration file LimoMod.ini

Default Version

; Version 0.7b

[Keys]

init=0x76	; F7 to toggle the mod
nextseat=0x27	; Right Arrow to move to next seat
prevseat=0x25	; Left Arrow to move to previous seat
radiotoggle=0xBD	; Minus to toggle radio
radionext=0xBE	; Period to switch to next radio station
radioprev=0xBC	; Comma to switch to previous radio station
tvtoggle=0x65	; Numpad 5 to toggle tv
tvnext=0x66	; Numpad 6 to switch to next tv station
tvprev=0x64	; Numpad 4 to switch to previous tv station
tvvolumeup=0x68	; Numpad 8 to turn tv volume up
tvvolumedown=0x62	; Numpad 2 to turn tv volume down
tvbrightup=0x6B	; Numpad Add to turn TV brightness up
tvbrightdown=0x6D	; Numpad Subtract to turn TV brightness down
windowup=0x21	; PageUp to roll up window
windowdown=0x22	; PageDown to roll down window
speedup=0x57	; W to make drive go faster
speeddown=0x53	; S to make driver go slower or stop
action=0x0D	; Press Enter to start action - new in 0.7b
company=0x77	; F8 to toggle some female company - new in 0.7b

[Settings]

tvpos=1 ; TV installed at the bottom(=0) or under the limo roof(=1)

[Keys] section

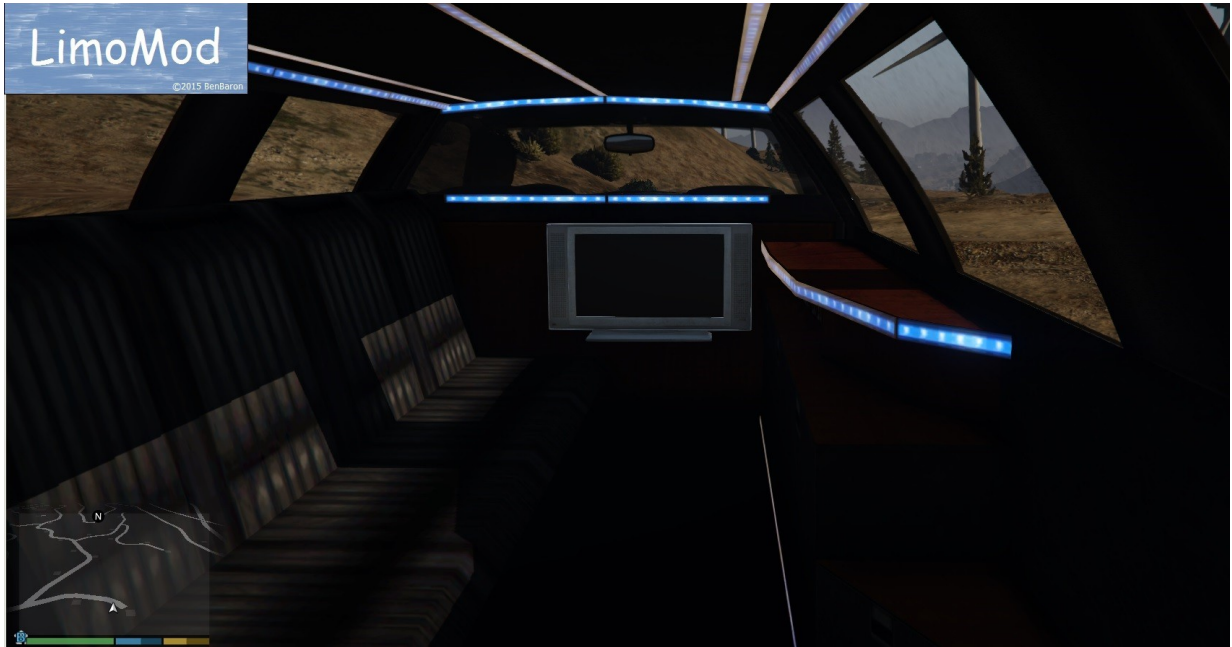

You can change every key used by the mod. Simply change the hexadecimal values (like 0x76 representing F7) to your likings.

A full list of virtual keycodes showing the keys and their corresponding hex values can be found here: <https://msdn.microsoft.com/de-de/library/windows/desktop/dd375731%28v=vs.85%29.aspx> .

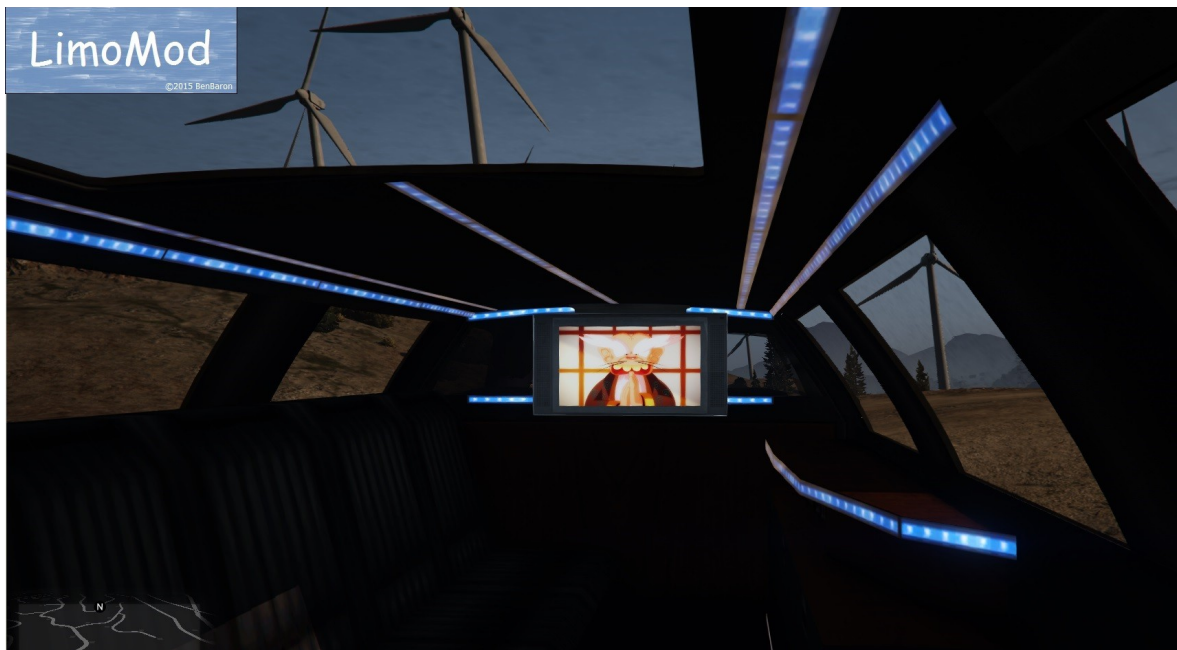

If you don't intent to use some of the mod's functions, like rolling down the windows (because you are using a different mod to achieve this, or you simply don't need it) you can disable the functions completely by simply deleting the whole key or by saving -1 as value (Example: windowdown=-1 is going to disable the function).

[Settings] section

Here, you can easily choose between two TV positions, or no TV at all for the limo:
tvpos=0 translates into this position,

while tvpos=1 ends out this way:

If you don't like the TV at all, simply delete the key or save it as tvpos=-1.

Usage

Press the initialization key (default: F7) to start the mod. A stretch limousine and a random driver will be spawned. From this point on, you can only get into this limousine, not in any other vehicle.

Once you enter the limousine, you will be seated in a passenger seat with your driver taking the drivers seat and starting the engine.

If you set your magenta marker on the ingame map, this becomes the destination and you will be driven there.

But you can also just press the keys to speed up or down without specifying a destination to make the driver roam around the countryside with you. - new in 0.7b

On route you can use keys to speed up (default: W ; normal → fast → reckless) and to speed down (default: S ; reckless → fast → normal → stop).

Switch seats (default: Left Arrow/Right Arrow),
roll the windows up and down (default: Page up/Page Down),
toggle the radio on or off (default: Minus) and
switch radio stations (default: Comma/Period) as you like.

You can also switch on the TV (default: NumPad 5),
change channels (default: NumPad 4/6)

and play with volume (default: NumPad 8/2) or
brightness controls (default: Numpad Add/Subtract).

But better not get your TV damaged (by, lets say, shooting on it), otherwise it will stop working.

If you feel lonely you can invite up to two girls riding with you (default: F8). After some time in the limousine (usually 2 - 5 minutes) they may start talking to you and be willing to please you. Move into the left passenger seat and press your action key (default: Enter) to accept their offer. But don't push too hard to seduce them or you're gonna scare them off. - new in 0.7b

It is also possible to change your destination or get out of the limo if you find something worth to take a look and continue driving to your destination later on. Your driver will follow you and protect you, should you get in any trouble, although you should not use him/her for massive shootouts and such as he/she is unarmoured and only equipped with a pistol.

Once you arrive at your destination, you can choose a different location to be driven to or get out and take a look.

Known Issues

- in order to get the height of the location where the magenta marker is positioned I am doing a short back and forth teleport operation at the moment which is visible in form of a small graphical distortion
- under circumstances, the driver may start fighting cops who are attacking someone else on his/her own, so either help, sit and watch until he/she wins and continues driving or gets killed in the process :-)
- if you get out of the limo, the driver may occasionally get out with you...just to get in again...jut to get finally out
- the AI of GTA V in terms of pathfinding works...sometimes :-), so depending on the situation some odd routings or even remaining stuck are possible
- driving around **without a destination** set, until now, there won't be any difference in terms of speed driving normal or fast, only reckless will make a difference
- driving around **without a destination** set in normal or fast mode, until now, sometimes the driver will stop without moving again, if this happens switch to reckless and back to normal
- only if you play as Michael, Franklin or Trevor you will here the Player's audio being played during the service offered by the girls, otherwise only their audio is audible

Comments

This is my first mod for any GTA version and while I am somehow experienced with C++ and C# I still need to learn a lot on how to mod for GTA V. So, this is a testing ground for me, where I try to figure out how things work in the GTA world and there most likely will be issues, as I did only test the mod on my system and not extensively.

In addition, as it is a very new game and I highly doubt there will ever be any documentation from Rockstar's side, a lot of trial and error needs to be done in terms of modding and a lot of work is still needed documenting all the functions available, how they work and what they do.

Anyways, I am always open for comments and new ideas, so if you got any problems running the mod or you'd like something to be included chime in or pm me (BenBaron) on <http://www.gtaforums.com> . I am also willing to help with other mods, or to discuss new ideas, if need be and time allows.

I am quite sure I am going to add some more features, time permitting, like having some nice company driving in the back with you :-).

I also want to thank Alexander Blade for his awesome and continued work on the ScriptHook V, as without it this mod would never have been possible. For this, my skillset is way too limited :-).

Version History

- Version 0.5b → first release version
- Version 0.6b → second release version
 - ◆ changes in LimoMod.pdf, added "Configuration file LimoMod.ini" chapter
 - ◆ bug fixed where mod was not loading for some people
 - ◆ "TV" feature added to the mod
- Version 0.7b → third release version
 - ◆ different fixes and improvements
 - ◆ added female company feature
 - ◆ changes in LimoMod.pdf to account for female company feature (green)
 - ◆ reckless driving is now more prone to not stopping and trying harder to avoid obstacles
 - ◆ added free roam mode
